

SOLUTION DATASHEET

Cardiovascular Health

Drive patient engagement and improve outcomes with a connected patient experience for comprehensive cardiovascular care needs, driven by specific communication protocols and clinical content.

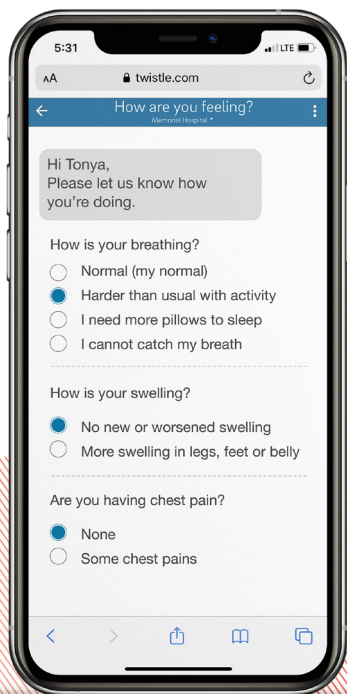

PROVEN RESULTS

Twistle's automated, HIPAA-compliant clinical pathways communicate with, monitor, and coach patients before and after tests, appointments, procedures, and surgical events.

Typical results include:

- 33%** Fewer no-show & canceled appointments
- 29%** Reduction in phone calls
- 12%** Shorter length of stay
- 7%** Reduction in surgical site infections
- 35%** Fewer readmissions & ED visits
- 12%** Greater patient satisfaction
- 40%** Increase in care navigator productivity

Twistle collaborates with clients to identify target outcome improvements and return on investment through analysis of current performance data. [Contact us](#) to learn more.

ENGAGE PATIENTS ON MOBILE DEVICES

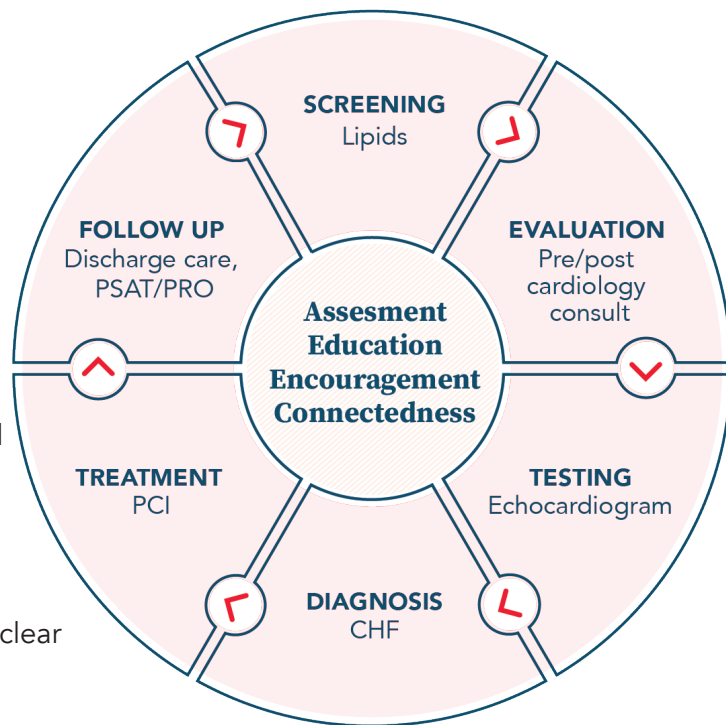

- Assessment forms
- Appointment reminders
- Care plan instructions
- Educational videos
- Encouragement
- Navigation / Directions
- Prevention and wellness coaching
- Remote patient monitoring
- Satisfaction surveys

CLINICAL BEST PRACTICES

An extensive library of communication pathways support patients and providers throughout a variety of cardiovascular care journeys with engaging content that supports optimal patient outcomes, expands care team capacity and enhances revenue capture for billable care events:

- Acute Myocardial Infarction (AMI)
- Congestive Heart Failure (CHF)
- Coronary Artery Bypass Graft (CABG)
- Coronary Artery Disease (CAD)
- Hypertension
- Medication titration and adherence
- Percutaneous Coronary Intervention (PCI)
- Procedures including echocardiogram and nuclear stress test
- Silent neuronal injury
- Ventricular Assist Device (VAD)

REMOTE PATIENT MONITORING

Twistle’s integration with remote patient monitoring (RPM) devices further automates and streamlines your ability to collect important patient data and intervene before complications arise.

- Activity trackers
- Blood pressure monitors
- Heart rate monitors
- Pulse oximeters
- Continuous Positive Airway Pressure (CPAP) appliances
- Weight scales

RAPID IMPLEMENTATION

Jump-start your cardiovascular patient engagement program with Twistle. Our experienced team and extensive clinical content library will support your go-live within weeks and produce measurable outcome improvements. [Contact us](#) today.
